Ex installation prescriptions

It is necessary to take into consideration the valid international and national rules and regulations (IEC 60079-14). The optical fibre must only be operated with ATEX/IECEX homologated sensors from Matrix Elektronik AG. The maximum rated optical input power must not be exceeded. The local equipotential bonding have to be done by grounding the fixed sensor. Other than original manufacturer, additional optical lenses are not allowed in hazardous locations. The fibre optics have to be installed in a manner that avoids tensile stress and frictional heat. If fibre optics and associated sensors are not mounted in the same hazardous location, the change over of the different areas must be realized in accordance with the valid regulations. The product KM-6-**-V2A-OS-OP1-S289 is applicable in Ex zones 0, 1, 2, 20, 21 and 22.

Function

The glass rod prism, with connected fibre optics, are applicable for optical level detection of liquids in Ex hazardous locations and can be operated with certificated fibre optics and sensors, with a wavelength of 500nm to 900nm.
